

Student Enrollment & Course Management System (SECMS)

User Story:

The Student Enrollment & Course Management System is a comprehensive Salesforce application designed to streamline and automate the academic enrollment operations of an educational institute. This system enables administrators, enrollment officers, and instructors to efficiently manage student records, course offerings, enrollments, instructor assignments, approval processes, payments, and reporting— all within a unified Salesforce environment.

1. INTRODUCTION

1.1 Project Overview :

This project aims to centralize all student, course, and enrollment-related data within a single Salesforce application to ensure easy data access, structured workflows, and accurate reporting. The system allows Enrollment Officers to manage student admissions, course registrations, and communication effectively, while instructors and administrators gain full transparency into course allocations and academic progress. The solution also enables automated instructor assignment, task creation, validation checks, and multi-level approval processes for enrollment management.

With Salesforce Flows, Approval Processes, Validation Rules, Reports, and Dashboards, the organization can ensure that all enrollment operations— from admission to course completion— are handled systematically and with continuous monitoring of key performance indicators such as enrollment volume, revenue, student status distribution, and pending approvals.

1.2 Purpose :

The primary purpose of SECMS is to replace manual and fragmented enrollment processes with a scalable, automated, and secure Salesforce solution that ensures:

Accurate student data management
Structured enrollment workflows
Automated approvals and validations
Transparent reporting and monitoring

2. IDEATION PHASE

2.1 Problem Statement (Customer Problem Statement Template)

PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Enrollment Offi cer	manage student enrollment s	enrollment data is scatter ed	systems are manual and	frustrated and error- prone
PS-2	Administrator	efficiently track enrollment s and revenue	reporting is delayed	unintegrat ed data is not centralized	uncertain in decision- ma king

2. IDEATION PHASE

2.1 Problem Statement (Customer Problem Statement Template)

2.2 Empathy Map Canvas

User Persona: Enrollment Officer

Think & Feel: Concerned about double bookings and revenue loss

Hear: Complaints from students and management

See: Multiple spreadsheets and emails

Say & Do: Rechecks data, follows up manually

Pain: Duplicate entries, approval bottlenecks

Gain: Automation, dashboards, faster processing

2. IDEATION PHASE

2.2 Empathy Map Canvas

User Persona: Enrollment Officer

2.3 Brainstorming & Idea Prioritization

Step 1 – Brainstormed Ideas

Spreadsheet automation
Standalone enrollment portal
ERP integration
Salesforce-based enrollment system

Step 2 – Grouping

Manual solutions
Semi-automated solutions
Fully automated cloud solutions

Step 3 – Prioritization

Salesforce-based SECMS was selected due to **high feasibility** and **high impact** .

3.REQUIREMENT ANALYSIS PHASE

3.1 Customer Journey Map

Stages covered:

Awareness & Registration
Course Selection
Enrollment Request
Fee Payment
Approval
Instructor Assignment

Reporting & Completion

3.2 Solution Requirements

Functional Requirements

FR No	Epic	Description
FR-1	Student Management	Manage student records
FR-2	Course Management	Create and manage courses
FR-3	Enrollment Processing	Request, approve, reject enrollments

FR-4	Instructor Assignment	Auto-assign instructors
FR-5	Reporting	Dashboards and reports

Non-Functional Requirements

NFR-1: Usability

The system shall provide a simple, intuitive, and user-friendly interface that enables enrollment officers, administrators, instructors, and students to perform operations efficiently with minimal training. Navigation shall be organized through clearly labeled tabs, dashboards, and forms to reduce user effort and errors.

Examples:

- Quick student registration form
- One-click enrollment approval
- Role-based dashboards

NFR-2: Security

The system shall ensure the confidentiality, integrity, and protection of student and institutional data through secure authentication, authorization, and access controls. Sensitive information such as personal data, enrollment history, and academic records shall only be accessible to authorized users.

Examples:

- Only admins can modify course details
- Instructors view only assigned students
- Students cannot access other student records

NFR-3: Reliability

The system shall operate consistently and accurately without failures during enrollment processing, approvals, and reporting. Automation logic shall execute correctly to avoid duplicate or incorrect enrollments.

Examples:

- No duplicate course registration
- Accurate status updates after approvals
- Consistent report generation

NFR-4: Performance

The system shall provide fast response times for all operations to ensure smooth and uninterrupted user experience, especially during peak admission periods.

Examples:

- Quick dashboard refresh
- Fast search for student records
- No lag during bulk uploads

NFR-5: Scalability

The system shall support future growth in the number of students, courses, departments and users without degradation in performance or functionality. It shall allow easy addition of new modules and features.

Examples:

- Add new departments without redesign
- Handle increased admissions annually
- Extend to mobile or portal integration

NFR-6: Availability

The system shall be continuously accessible to users during institutional working hours and must minimize downtime. The platform shall support high availability for academic operations.

Examples:

- 24/7 cloud access
- Reliable during peak admission season
- Automatic backup of student records

3.3 Data Flow Diagram

User inputs student and enrollment data
System validates and stores records
Approval process routes data
Reports and dashboards consume processed data.

The system processes enrollment requests, validates data, routes approvals, assigns instructors, and generates reports.

3.4 Technology Stack

Layer	Technology
UI	Salesforce Lightning

Logic	Salesforce Flows
Database	Salesforce Objects
Automation	Validation Rules, Approval Process
Reporting	Reports & Dashboards

4. PROJECT DESIGN PHASE

4.1 Problem–Solution Fit

SECMS directly addresses fragmented enrollment workflows by aligning user behavior, constraints, and automation using Salesforce-native capabilities.

4.2 Proposed Solution

Functional Requirements

Parameter	Description
Problem	Manual enrollment handling
Solution	Salesforce-based SECMS
Novelty	End-to-end automation
Social Impact	Improved student experience
Revenue Model	Institutional deployment
Scalability	Multi-department support

4.3 Solution Architecture

The architecture integrates Salesforce objects, automation flows, approval processes, dashboards, and security layers.

4.3 Solution Architecture

5. PROJECT PLANNING & SCHEDULING

5.1 Project Planning

6. Project Development Phase:

Project Flow:

Milestone 1: Salesforce Developer Account Creation

Milestone 2: Custom Object Creation (Student, Course, Enrollment, Instructor)

Milestone 3: Tabs Creation

Milestone 4: Lightning App Creation

Milestone 5: Fields Creation

Milestone 6: Create Relationships

Milestone 7: Page Layout Customization

Milestone 8: Validation Rules

Milestone 9: Flows (Automation)

Milestone 10: Approval Process

Milestone 11: Reports

Milestone 12: Dashboards

Milestone 13: Security Setup

Milestone 14: Conclusion

What you'll learn

1. Real-time Salesforce project implementation
2. Designing custom objects and relationships
3. Creating page layouts & record types
4. Writing validation rules
5. Building automation with flows
6. Creating approval workflows
7. Developing reports & dashboards
8. Setting up security with profiles, permission sets, and sharing
9. End-to-end application testing

Milestone 1-Salesforce :

Introduction:

Are you new to Salesforce? Not sure exactly what it is, or how to use it? Don't know where you should start on your learning journey? If you've answered yes to any of these questions, then you're in the right place. This module is for you.

Welcome to Salesforce! Salesforce is game-changing technology, with a host of productivity-boosting features, that will help you sell smarter and faster. As you work toward your badge for this module, we'll take you through these features and answer the question, "What is Salesforce, anyway?".

What Is Salesforce?

Salesforce is your customer success platform, designed to help you sell, service, market, analyze, and connect with your customers.

Salesforce has everything you need to run your business from anywhere. Using standard products and features, you can manage relationships with prospects and customers, collaborate and engage with employees and partners, and store your data securely in the cloud. So what does that really mean? Well, before Salesforce, your contacts, emails, follow-up tasks, and prospective deals might have been organized something like this:

<https://youtu.be/r9EX3IGde5k>

Activity 1: Creating Developer Account:

Creating a developer org in salesforce.

Go to <https://developer.salesforce.com/signup>

On the sign up form, enter the following details :

Build for the Agentic Enterprise. Sign up for your Developer Edition.

The entire Salesforce platform - exposed as APIs, MCP tools, and CLI commands. Build apps, ship agents, and let coding agents do the heavy lifting with Salesforce Headless 360.

- Build AI agents with Agentforce, grounded in your data with Data 360
- Connect Claude Code, Cursor, or Codex to your org with hosted MCP
- Build in the browser with the Agentforce Vibes IDE - no setup required
- Drag-and-drop when you want it, Apex when you need it
- 60+ MCP tools and 30+ coding skills, ready out of the box

Sign up for your Developer Edition

A free Salesforce Platform environment with Agentforce and Data 360

First name: Pravinkumar ✓ Last name: K ✓

Job title: STUDENT ENROLLMENT B... ✓ Company: M.G.B Chockalingam Aya ✓

Country/region: India ✓ Work email: pravinkumar20324u18049@... ✓

☐ I agree to the Salesforce Agreement - Developer Edition, Salesforce Program Agreement, and All Terms of Service

Sign me up

First name: Pravinkumar.K

Email: pravinkumar20324u18049@gmail.com

Role : Student

Company : Dr.M.G.R Chockalingam Arts College

County : India

Postal Code : 632314

Username : pravinkumar20324u18049.d084eed0217e@agentforce.com

Activity 2: Account Activation:

1. Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 5-10mins.

2. Click on Verify Account

3. Give a password and answer a security question and click on change password.

Change Your Password

Enter a new password for **lead@sb.com**.
Make sure to include at least:

- 8 characters
- 1 letter
- 1 number

* New Password

Good

* Confirm New Password

Match

Security Question

▼ In what city were you born?

* Answer

Change Password

4. Then you will redirect to your salesforce setup page.

Milestone 2 – Objects:

Activity 1: Creating Student Object:

The purpose of creating the Student custom object is to store and manage information about students such as their personal details, contact information, and enrollment status.

To create the Student object:

Go to the Setup page.

Click on Object Manager.

Click on Create → Custom Object.

Enter the details as below:

1. Label: Student
2. Plural Label: Students
3. Object Name: Student
4. Record Name: Student Name
5. Data Type: Text
6. Under Optional Features, select:
7. Allow Reports
8. Allow Activities (optional but recommended)
9. Track Field History (optional, if you want)
10. Under Search Status, select:
11. Allow Search
12. Click Save.

Milestone 4 – Create Relationships:

1. Activity 1: Create Lookup from Enrollment to Student:

1.

Go to Setup → click Object Manager.

2. Type Enrollment in Quick Find → click Enrollment__c object.

3. Click Fields & Relationships → click New.

4. Select Lookup Relationship → click Next.

5. For Related To, select Student__c → click Next.

6. Enter Field Label: Student (API Name: Student__c).
7. Click Next through Field-Level Security and Layout options (ensure it's visible and added to layout).
8. Click Save.

Edit Enrollment Custom Field
Student

Step 1. Choose the field type Step 1

Specify the type of information that the custom field will contain.

Data Type

☐ None Selected Select one of the data types below.

☒ **Lookup Relationship** Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.

Field Label: Student

Field Name: Student

Description:

Help Text:

Child Relationship Name: Enrollments

do if the lookup record is deleted?

☒ Always require a value in this field in order to save a record

☐ Clear the value of this field. You can't choose this option if you make this field required.

☒ Don't allow deletion of the lookup record that's part of a lookup relationship.

Description

Specify the title that the related list will have in all of the layouts associated with the parent.

Related List Label **Enrollments**

Select the page layouts that should include this field. The field will be added as the last field in the first 2-column section of these page layouts. The field will not appear on any pages if you do not select a layout.

To change the location of this field on the page, you will need to customize the page layout. To change the values that appear, you will need to customize the Record Types.

Add Related List	Page Layout Name
☒	Instructor Layout

☒ Append related list to users' existing personal customizations

Milestone 5 – Validation Rules:

Activity 1: Student Email Domain Validation

Purpose:

To ensure students use only allowed institutional email addresses.

Steps:

Go to Setup → Object Manager → Student__c.

Click Validation Rules → New.

Rule Name: Student_Email_Domain_Validation.

Error Condition Formula: (example for @student.edu)

`NOT(CONTAINS(Email__c, "@student.edu"))`

Error Message: Email must be a valid student institutional email.

Error Location: Field → Email__c.

Click Save.

The screenshot shows the Salesforce Setup interface. The left sidebar contains a navigation menu with the following items: Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, Restriction Rules, Scoping Rules, Object Access, Triggers, Flow Triggers, and Validation Rules (highlighted with a red box). The main content area is titled 'SETUP > OBJECT MANAGER Student'. The 'Validation Rule Edit' form is displayed, with the following fields and values:

- Rule Name:** Email_Must_Be_Student_Domain (highlighted with a red box)
- Active:** ☒ (highlighted with a red box)
- Description:** (empty text area)
- Error Condition Formula:**
 - Example:** Discount_Percent__c > 0.30 (highlighted with a red box)
 - Display an error if:** Discount is more than 30%
 - If this formula expression is true, display the text defined in the Error Message area**
 - Formula:** NOT (CONTAINS (Email__c, "@student.edu")) (highlighted with a red box)
 - Check Syntax:** (button highlighted with a red box)
- Functions:** A list of functions including ABS, ACOS, ADDMONTHS, AND, ASCII, and ASIN. The 'ABS' function is selected, and its description is shown: 'ABS(number) Returns the absolute value of a number, a number without its sign'. A 'Help on this function' link is also present.

At the top right of the form, there are three buttons: 'Save' (highlighted with a red box), 'Save & New', and 'Cancel'.

13. Activate the approval process.

Milestone 7- Tabs

Activity 1: Creating a Tab for the Student Object:

Go to Setup.

1. In the Quick Find box, type Tabs.
2. Under Custom Object Tabs, click New.
3. Select Student from the object list.

4. Choose a tab style (icon).
5. Click Next, assign it to all profiles, and then click Save.

The screenshot shows the 'Edit Custom Object Tab' interface for the 'Students' object. The left sidebar contains a search bar with 'tab' entered, and a navigation menu with categories like 'Feature Settings', 'Analytics', 'User Interface', and 'Console Settings'. The 'Analytics' section is expanded, showing 'Tableau' and 'Tableau Embedding'. The 'User Interface' section is also expanded, showing 'Console Settings' and 'Loaded Console Tab Limit'. The 'Rename Tabs and Labels' section is highlighted, with 'Tabs' selected. The main content area is titled 'Edit Custom Object Tab Students' and includes a 'Custom Tab Definition Edit' section. This section contains a 'Custom Object Tab Information' table with the following data:

Tab Label	Students
Object	Student
Tab Style	Airplane

Below the table, there is a dropdown menu for 'Splash Page Custom Link' set to '-None-'. A text box for 'Description' is also present. At the bottom, there are 'Save' and 'Cancel' buttons.

Activity 2: Creating Remaining Tabs

Now create the Tabs for the remaining Objects, they are “Courses, Instructors, Enrollment”.

Follow the same steps as mentioned in Activity -1

Milestone 8 - The Lightning App

Activity 1: Creating the Lightning Application for the Project

Navigate to Setup.

Enter App Manager in the Quick Find search box.
Click New Lightning App.

Provide the app details:

App Name: Student Enrollment & Course Management

Developer Name auto-fills

Description: Optional, but can describe the purpose of the app

Click Next and choose the following settings:

App Branding (optional): Add logo or select color theme

Navigation Style: Choose Standard Navigation

Click Next and assign the app to specific profiles (e.g., **Admin, Enrollment Officer, Instructor**).

Click Next to select the items (tabs) to be included in the app. Add:

1. Student
2. Course
3. Instructor
4. Enrollment
5. Reports
6. Dashboards
7. Home
8. Tasks

Click Next and review the app settings.

Finally, click Save & Finish.

App Details & Branding

Give your Lightning app a name and description. Upload an image and choose the highlight color for its navigation bar.

Org Theme Options

☐ Use the app's image and color instead of the org's custom theme

Navigation Items

Choose the items to include in the app, and arrange the order in which they appear. Users can personalize the navigation to add or move items, but users can't remove or rename the navigation items available only for phone or only for desktop. These items are dropped from the navigation bar when the app is viewed in a format that the item doesn't support.

User Profiles

Choose the user profiles that can access this app.

Milestone 9 – Page Layouts and Record:

Activity 1: Create Record Types for Enrollment:

Purpose:

To separate New Enrollment vs Re-Enrollment processes.

Steps:

1. Go to Setup → Object Manager → Enrollment__c.

2. Click Record Types → New.

3. For the first record type:

Existing Record Type: Master

Record Type Label: New Enrollment

Enable for required profiles (Admin, Enrollment Officer).

Select the default Page Layout → Save & New.

4. For the second record type:

Record Type Label: Re-Enrollment

Enable for same profiles.

Select the default Page Layout → Save.

Activity 2: Separate Page Layout Createuts for Each Enrollment Record Type

Purpose:

To show different fields for New Enrollment vs Re-Enrollment.

Steps:

- 1.Enrollment__c object → click Page Layouts.
- 2.Click New to create a layout for New Enrollment:
Clone from existing Enrollment Layout → name it New Enrollment Layout → Save.
Keep fields relevant for first-time enrollment: Student, Course, Instructor, Enrollment Date, Status, Fees, etc.
Remove unnecessary re-enrollment fields if any.
Click Save.

The screenshot shows the Salesforce Page Layout creation interface for the Enrollment object. The left sidebar contains a navigation menu with options: Details, Fields & Relationships, Page Layouts (highlighted with a red box), Lightning Record Pages, Buttons, Links, and Actions, and Compact Layouts. The main content area is titled 'Create New Page Layout'. It includes a tip: 'As an option, you may select an existing layout to clone. If you create a page layout without cloning, your page layout will not include the standard fields.' Below this, there are two input fields: 'Existing Page Layout' with a dropdown menu showing 'Enrollment Layout' (highlighted with a red box), and 'Page Layout Name' with a text box containing 'New Enrollment Layout' (highlighted with a red box). At the bottom right of this section are 'Save' and 'Cancel' buttons, with 'Save' highlighted by a red box. Below this section, there is a 'Layout Properties' window. It has a 'Quick Find' field and a table of fields. The table has columns for 'Field Name', 'Enrollment Status', 'Owner', 'Created By', 'Fees Paid', and 'Record Type'. The fields listed are: Section, Course Fee, Enrollment Status, Owner, Blank Space, Created By, Fees Paid, Record Type, Comments, Enrolement Name, Instructor, Student, Course, Enrollment_Date, Last Modified By. Below the table, there is a list of fields with their values: Enrolement Name (Sample Text), Student (Sample Text), Course (Sample Text), Instructor (Sample Text), Enrollment_Date (12/22/2025), Enrollment Status (Sample Text), Fees Paid (checked), Comments (Sample Text), and Course Fee (\$123.45). This entire list of fields is highlighted with a red box. The bottom right corner of the screenshot shows the text 'Own'.

- 3.Again, click New to create Re-Enrollment Layout:

Clone existing layout → name it Re-Enrollment Layout → Save.
 Include fields like previous Enrollment reference (if any),
 Re-Enrollment Reason, Status, Fees, etc.
 Click Save.

The first screenshot shows the 'Create New Page Layout' dialog box. The 'Existing Page Layout' dropdown is set to 'Enrollment Layout', and the 'Page Layout Name' field is 'Re-Enrollment Layout'. The 'Save' button is highlighted with a red box.

The second screenshot shows the 'Layout Properties' window for the 'Re-Enrollment Layout'. The 'Save' button in the top left is highlighted with a red box. The 'Fields' list on the left is also highlighted with a red box. The main area shows a table of fields and their values:

Field Name	Value
Enrollment Name	Sample Text
Student	Sample Text
Course	Sample Text
Enrollment Status	Sample Text
Fees Paid	✓
Enrollment Date	12/22/2025
Comments	Sample Text
Course Fee	\$123.45
Instructor	Sample Text

4. Click Page Layout Assignment → Edit Assignment.
 5. For each profile and record type:

New Enrollment → use New Enrollment Layout.
 6. Re-Enrollment → use Re-Enrollment Layout.
 Click Save.

Activity 3: Enrollment Related Lists to Parent Objects:

Purpose:

To see all Enrollments from Student, Course, and Instructor records.

a) Student → Enrollment Related List

Go to Setup → Object Manager → Student__c.

Click Page Layouts → open the main layout.

In the palette, select Related Lists.

Drag Enrollments related list onto the layout.

Customize columns if needed → Save.

b) Course → Enrollment Related List

Go to Object Manager → Course__c → Page Layouts.

Open layout → add Enrollments related list.

Save.

c) Instructor → Enrollment Related List

Go to Object Manager → Instructor__c → Page Layouts.

Open layout → add Enrollments related list.

Save.

Milestone 10 – Automation with Flow

Activity 1: Auto-Populate Enrollment Date (Record-Triggered Flow)

Purpose:

Set Enrollment_Date__c to today when Enrollment is created.

Steps:

1. Go to Setup → Flows → New Flow.
2. Select Record-Triggered Flow → Create.
3. Object: Enrollment__c.
4. Trigger: A record is created.
5. Optimize for Actions and Related Records → Done.

Select Object

Select the object whose records trigger the flow when they're created, updated, or deleted.

* Object

Enrollment

Configure Trigger

Trigger the Flow When:

- ☒ A record is created
- ☐ A record is updated
- ☐ A record is created or updated
- ☐ A record is deleted
-

Set Entry Conditions

Specify entry conditions to reduce the number of records that trigger the flow and the number of records that trigger the flow to conserve your org's resources.

Condition Requirements

None ▼

6. Add Update Records element:
Label: Set Enrollment Date.
Use record that triggered the flow.
Field: Enrollment_Date__c → Value: \$Flow.CurrentDate.

7. Save as SetEnrollmentDate → Activate.

 Update Records

* Label

Set Enrollment Date

* API Name ⓘ

Set_Enrollment_Date

Description

* How to Find Records to Update and Set Their Values

☒ Use the enrollment record that triggered the flow

☐ Update records related to the enrollment record that triggered the flow

☐ Use the IDs and all field values from a record or record collection

☐ Specify conditions to identify records, and set fields individually

Set Filter Conditions

Condition Requirements to Update Record

None—Always Update Record ▼

Set Field Values for the Enrollment Record

Field

 Enrollment_Date ×

Value

 Running Flow Interview > CurrentDate ×

Activity 2: Send Email When Enrollment Approved

Purpose:

When Enrollment_Status__c = Approved, send email, alert admin, and set Student to Active.

Steps (high level for document):

1. Create Email Template and Email Alert for student notification.

2. Go to Flows → New → Record-Triggered Flow.
3. Object: Enrollment__c, Trigger on update.
4. Condition: Enrollment_Status__c Equals "Approved".

 Configure Start

Enrollment

Configure Trigger

Trigger the Flow When:

☐ A record is created

☐ A record is updated

☒ A record is created or updated

☐ A record is deleted

Set Entry Conditions

Specify entry conditions to reduce the number of records that trigger the flow and the number of times the flow is executed. Minimizing unnecessary flow executions helps to conserve your org's resources.

If you create a flow that's triggered when a record is updated, we recommend first defining entry conditions. Then select the **Only when a record is updated to meet the condition requirements** option for When to Run the Flow for Updated Records.

Condition Requirements

All Conditions Are Met (AND) ▼

Field	Operator	Value	
 Enrollment Status 	Equals ▼	 Approved 	

5. Add Get Records to fetch related Student__c.

Enrollment Approved EmailAlert

* Label

Send Student Email

* API Name 

Send_Student_Email

Description

Use values from earlier in the flow to set the inputs for the "Enrollment Approved EmailAlert" email alert. To use its outputs later in the flow, store them in variables.

Set Input Values

A_a * Record ID 

A_a Triggering Enrolement__c > Record ID 

7. Add Action to notify Admin if needed.

8. Add Update Records to set Student__c.Status__c = "Active".

Update Records

9. Save as Enrollment Approved Action → Activate.

Activity 3: Auto-Assign Instructor Based on Course Category

Purpose:

Assign Instructor automatically based on Course category.

Rules:

Technical → Instructor A

Language → Instructor B

Non-Technical → Instructor C

Steps:

1. Prepare Instructor__c records with codes (e.g., INSTR_A, INSTR_B, INSTR_C).
2. Create Record-Triggered Flow on Enrollment__c (created/updated).
3. Add Get Records to fetch related Course__c.
4. Add Decision element on Course__r.Category__c:
5. Technical / Language / Non-Technical outcomes.
6. For each outcome:
7. Get Instructor record (A/B/C) based on code or name.
8. Update Records: set Instructor__c = Get_Instructor_X.Id.
9. Save as AutoAssign_Instructor → Activate.

Activity 4: Auto-Create Task for Follow-Up

Purpose:

When Enrollment is “Requested”, create a follow-up task for Admin.

Steps:

1. Create Record-Triggered Flow on Enrollment__c.
2. Trigger: Record created or updated; condition Enrollment_Status__c = "Requested".

 Configure Start ×

* Object

Configure Trigger

Trigger the Flow When:

☐ A record is created

☐ A record is updated

☒ A record is created or updated

10. Save as Create_Followup_Task → Activate.

Milestone 11 – Reports:

Activity 1: Create “Students by Status” Report

1. Go to **Reports** → **New Report**.
2. Report Type: **Students**.
3. Group rows by **Status__c**.
4. Add columns as needed (Name, Email, Phone).
5. Save as **Students by Status**.

Activity 2: Create “Enrollments by Course” Report

1. New Report → Report Type: **Enrollments** .
2. Grouprows by **Course__r.Name** .
3. Show Record Count per course.
4. Save as **Enrollments by Course**

Activity 3: Create “Pending Enrollment Approvals” Report

- 1.New Report → **Enrollments** report type.
- 2.Filter: **Enrollment_Status__c = "Requested"** .
- 3.Add columns (Student, Course, Owner, Created Date).
- 4.Save as **Pending Enrollment Approvals** .

Enrollment: Owner Name	Enrollment: Enrolment Name	Course	Enrollment Status	Enrollment Date	Enrollment: Created Date
sai kumar A	Sushanth	Computer Science	Requested	12/5/2025	12/5/2025
	Vignesh	Electronic Communications & Engineering	Requested	12/5/2025	12/5/2025
Subtotal					
Total (2)					

Activity 4: Create “Revenue Report (Fees Paid)” Report

- 1.New Report → **Enrollments** report type.
- 2.Filter: **Fees_Paid__c = TRUE** .
- 3.Group by **Course__r.Name** .
- 4.Summarize **Course_Fee__c** or similar fee field.
- 5.Save as **Revenue Report – Fees Paid** .

Milestone 12 – Dashboards:

Activity 1: Create “Student Management Dashboard”

Steps:

1. Go to **Dashboards** → **New Dashboard**.
2. Name: **Student Management Dashboard**.

3. Select folder → **Create**.
4. Select new Dashboard folder and Save.

Add components:

Donut Chart → using **Students by Status** report.

Bar Chart → using **Enrollments by Course** report.

Gauge → using **Revenue Report – Fees Paid** (sum of revenue field).

Table → using **Pending Enrollment Approvals** report.

4. Arrange components on canvas.

Click **Save** → **Done**.

Milestone 13 – Security Setup

Activity 1: Configure Profiles

):

1. Go to **Setup** → **Profiles** → **New** (or Clone **Profiles**

Required:

Admin – Full access.

Enrollment Officer – Create/Update Enrollments.

Instructor – Read-only access to assigned Enrollments.

2.Steps (example for Enrollment Officer fName:

Enrollment Officer .

3.In **Object Settings** :

Enrollment__c : Read, Create, Edit.

Student__c / Course__c: Read (and Edit if required).

4.Save.

Repeat similarly for **Instructor** profile with **Read-Only** on Enrollments

Activity 2: Create Permission Sets

1.Go to **Setup → Permission Sets → New** .

2.Create **Custom Object Access** (additional access to project objects if needed).

3.Create **Dashboard Editor** (Create/Customize Reports & Dashboards permissions).

4.Assign to relevant users.

Activity 3: Configure Sharing & OWD

Steps:

1.Go to **Setup → Sharing Settings** .

2.Set **Organization-Wide Defaults** :

Students (Student__c): Public Read/Write.

Courses (Course__c): Public Read/Write.

Enrollments (Enrollment__c): Private.

3.Save.

For Instructor access to assigned Enrollments,
optionally:

Add a **User lookup** on Enrollment (Instructor User).

Use a simple **Record-Triggered Flow** to set **OwnerId = Instructor User** so they can see only their own records.

7. FUNCTIONAL & PERFORMANCE TESTING

During the testing phase, screenshots were captured from the Salesforce user interface to verify the proper functioning of all implemented features of the Student Enrollment & Course Management System (SECMS). These include student, course, instructor, and enrollment record creation; validation rule checks for mandatory fields, eligibility, and enrollment constraints; verification of record type behavior for different course categories; flow execution for automated enrollment approvals and seat availability checks; and Apex trigger functionality to ensure automatic confirmation and record updates. Additionally, screenshots of generated reports and dashboards were documented to validate accurate data visualization, enrollment tracking, and performance monitoring. Submit the Screenshots while testing.

8. ADVANTAGES & DISADVANTAGES

Advantages

- Centralized data
- Automated workflows
- Real-time reporting

Disadvantages

- Salesforce dependency
- Requires initial configuration effort

9. Conclusion:

The Salesforce Student Enrollment & Course Management System successfully streamlines the entire student academic lifecycle— from student registration and course creation to enrollment management, instructor assignment, approvals, revenue tracking, and reporting. By leveraging Salesforce’s automation tools such as validation rules, flows, approval processes, and dashboards, the system improves data accuracy, operational efficiency, and decision-making. This project demonstrates how Salesforce can transform manual academic processes into a scalable, reliable, and user-friendly digital solution.

10. FUTURE SCOPE

- Payment gateway integration
- Student self-service portal
- Analytics-driven insights

Mobile access support
